August 13, 2026

1 Introduction

EventPass is a web application for event organizers to manage event attendance.

2 Product Perspective

The system is a single-tenant event management system for a small organizer workflow.

3 Functional Requirements

1. Organizer registration and login
2. Event creation and management
3. Attendee registration
4. Unique ticket generation
5. Ticket lookup and check-in
6. Duplicate prevention
7. Event statistics

4 Non-functional Requirements

- Secure authentication
- Data isolation
- Fast check-in workflow
- Simple setup

5 Scope

The project includes the essential event ticketing flow and excludes enterprise-level functionality.
